Annexure 15: Livestock Produce Distribution points & Plan COVID-19 CONTINGENCY PLAN FOR LIVESTOCK SECTOR,

THIMPHU DZONGKHAG ADMINISTRATION

10th August 2020

Prepared By:

Dzongkhag Livestock Sector, Thimphu

Purpose

The purpose of this Contingency Plan (CP) is to assist the Dzongkhag Administration, Thimphu and in particular Dzongkhag Livestock Sector who are responsible for planning, implementation, supervision and monitoring of the livestock programme in the Dzongkhag. This plan is envisioned to provide un-interrupted livestock service delivery to the farmers in the event of lockdown due to COVID 19 outbreak in the country.

Objectives

To identify potential threats and risk to livestock service delivery that may arise from lockdown due to COVID-19 and take measures through the preparedness of implementable CP.

Scenario

The livestock sector foresees major disruption in dairy, poultry and animal health activities in the event of lockdown due to COVID-19 outbreak in the country.

Livestock Product collection and marketing

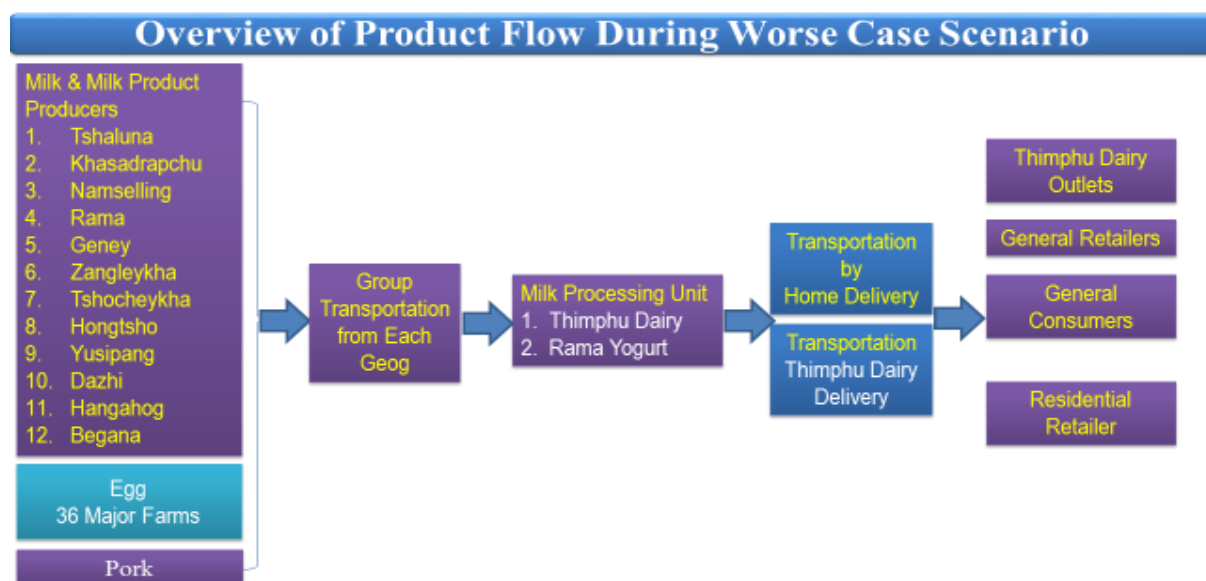

Thimphu Livestock Sector had formed 12 dairy cooperatives and registered with DAMC, MoAF. These Groups has been collecting and marketing the fresh milk at Milk Processing Unit (MPU) such as Thimphu Dairy and Rama Yogurt since September 2017. Currently, the 223 DFGs members deliver fresh milk daily at MPUs. During the month of July 2020, the MPU collected about 40860 litres of fresh milk. Around 45% of the milk collected was sold as fresh milk, 43% as farm-fresh yoghurt and the remaining 12% as curd. The schools, institutions, resorts, hoteliers, shops and public of Thimphu city and nearby Dzongkhags are the major customers for the dairy products. Some of the key drivers for market growth and sustainability of Thimphu Dairy MPU was growing population, increase consumer awareness and change in consumer dietary patterns.

Impact of COVID-19

The lockdown due to COVID-19 outbreak could impact the supply chains and may disrupt daily operations of livestock developmental activities in the Dzongkhag. The most vulnerable activities are those of input supplies which rely heavily or solely on factories and suppliers such as commercial feeds for poultry layer farming, packaging materials for MPU and veterinary medicines and vaccines for animal health services.

The Livestock Production related issues will be coordinated by Livestock Production Officer based at Dzongkhag HQ, Thimphu.
